If the last 2 years have taught us anything it's the increased value we place on privacy, sustainability and the capacity to make that elusive work life balance a reality. That "one day" dream of escaping the rat race and following your heart, is now more possible than ever before. To find a property with all the attributes of manageable land size, good soil and rainfall, top notch infrastructure, a quality home, necessary connectivity and proximity to shopping, education and medical amenities and an airport is the typical stumbling block - but not for this property!

For those seeking a sustainable life, a little over half of the property is cleared paddocks with the balance being a mix of cleared land and native bush, also suitable for stock. The multiple horse paddocks lend themselves to regenerative rotation grazing, allowing for stock to be moved from paddock to paddock without strip feeding, a great way to manage feed and good interconnection makes moving stock and possibly relocating a chicken tractor to follow along as well. The soil is a rich friable loam which drains well and has never been cultivated before so there are no residual chemicals. The spring fed dams have never dried up which suggests that investigating a site for a bore would be a strong possibility if required.

The township of Mapleton offers local shopping, medical centre, restaurants and hotel and a primary school and is a stepping off point to the rest of the beautiful Hinterland. Beaches, major shopping centres, restaurants, theatres etc. are all within 40 minutes' drive.

Call for a private inspection and bring along your wish list, you will not be disappointed!
